

Here you can find the documentation of the Agile/Scrum Workshop.

Important: Singular topics are **extracted** from this document and are covered in a more detailed way on further subpages of this category.

## Scrum is a Framework

Our scrum consists of:

- [4 Roles \(Team\)](#)
- [3 Artefacts](#)
- [4 Ceremonies \(Meetings\)](#)
- [12 Principles](#)
- [5 Values](#)

## Scrum Sprint Cycle

The work is organised in **sprints**. The length of the sprint is 1 to 4 weeks. The shorter period is to be preferred, as this gives us **shorter time to market**, it introduces **feedback sooner** and it allows us to **react faster to change**

## Our Boundaries

Here we define our standards, our workflows, here we define what are the minimum requirements to be met in **each** ticket before it can be implemented (Definition Of Ready) and also define when the implementation work is **completed** (Definition Of Done):

[Definition Of Ready](#)

[Definition Of Done](#)

**From one of the Authors of the manifesto, a word about Agility:**
